BORDERLAND SCIENCE RESEARCH ASSOCIATES

Project Survival and Service

The purpose of Project SS is to stay in communication with those of "like-mind" if comes a period of world-wide disorder and confusion. The Project IS NOT an attempt at personal survival only; but those that ARE left should be prepared in every possible way to survive as long as possible, and to carry forward whatever knowledge they can. We feel that this might be better accomplished if several associates can contact one another and pool their knowledge and resources.

ITEM 1) The first stage of Project SS has been completed. All associates that were interested sent in their names and addresses; these were compiled, and distributed to all those that sent in the requested information.

ITEM 2) In case you were left out, and want to get in on this project, it is POSSIBLE that another release will be made up. If you want to be included, send us:

a) General Delivery addresses preferably; scattered around the country.
b) You DO NOT have to call for mail in person, but can write for it.
c) Specific suggestions of towns that can be used for gathering centers for small groups in case people (you) are de-homed.
d) An example of what we want you to send us is:

NOW- John Q. Public, 1000 USA Drive, Washington, D.C.
EMERG- Gen. Del: Denver, Colo; Tucson, Ariz; Great Bend, Kans; Salt Lake City, Utah. (These are examples only)

And also a town that YOU think would be comparatively safe from bombs, floods, etc.; and might offer natural protection.

e) These are EMERGENCY ADDRESSES ONLY. In all cases, the home address should be contacted first.

ITEM 3) Mr. S.N. Green, Box 127, Bayfield, Colorado, is setting up an important project which is explained to you in a release you already have. As another possible method of staying in contact (via amateur radio) list with Mr. Green your name, address, and local phone number.

ITEM 4) In case communications are down, and in case you find yourself homeless, following are a list of cities to gather at. New York, Los Angeles, and San Diego, are included because there are so many members in these areas. However, these towns are not recommended if it would involve traveling any distance. Use one of the other towns. Suggested meeting place is the MAIN PUBLIC LIBRARY BUILDING. Practically every town has a library of some sort. Display membership card for recognition; (i.e., hold in hand, pin to lapel, any visible place). Second choice in case library is destroyed is to list your name with the Salvation Army and the Red Cross, using the middle name BORS* (for Borderland Science) for recognition by others. TOWNS ARE:

Los Angeles, Calif. -- San Diego, Calif. -- Las Vegas, Nevada -- Moscow, Idaho -- Durango, Colo. -- Texarkana (Texas & Arkansas border) -- Maquoketa, Iowa -- DeFuniak Springs, Fla. -- Charlestown, W. Va. -- Utica, N.Y. -- New York City, N.Y.

ADDRESS PROJECT SS COMMUNICATIONS TO: D.J. YORK - Box 151 - K.C. 10, Mo.

(*Attn. some members - note change here to BORS)
